

Samples of our Work

GEOTECHNICAL PROJECTS

Work on this Project included:

- A design revision to prevent frost heaving.
- 16,000 m² Woven and Non-Geotextile.
- Placement of EPS (Polystyrene Insulation) in the roadbed to prevent freeze-thaw action on a problematic section of the highway.

Highway 11 – Restoration of Ride Quality

Highway 22– Resurfacing 40.2km in partnership with Alberta Transportation and Aecon Transportation West.

Innovations on this Project included:

- Inclusion of specialized asphalt mixes to improve traction on collision prone segments.
- Installation of 7,800 metres of cable barrier to reduce snow drifting.
- Placement of EPS (Polystyrene Insulation) in the roadbed to prevent freeze-thaw action on a problematic section of the highway.
